# Work Experience

**Frontend Developer** at Saigon University

2024 - Present

Currently I am a 3rd year student and have no work experience. But I have participated and successfully completed projects and subject projects at school and have experience working in groups. Therefore, I think I can do a good job when I go to work.

# Education

**Information Technology** from SaiGon University

2021 - 2026

Currently studying 3rd year majoring in software engineering. During my time at school, I learned a solid foundation in front-end development, including HTML, CSS and Java... I applied this knowledge to build static and dynamic websites, from from creating structure and designing the interface to adding animations and user interactions. Additionally, I have also had the opportunity to participate in hands-on projects in software engineering, where I took on the role of front-end developer to implement requirements and designs from the team. These experiences have helped me practice programming and teamwork skills, as well as better understand the software development process in a real-world environment.

**Web Programming Course** from dunglailaptrinh.com

2024

Learning PHP opened new doors for me in the world of web development. I understand how to use PHP to create dynamic and interactive websites, connect to databases, process user data, and create diverse web applications such as blogs, forums, and online stores . This has enhanced my web development abilities and expanded the scope of projects I can work on.

**Html, css, javascript courses** from fullstack.edu.vn

2023

After learning HTML, CSS and JavaScript, I have the basic knowledge and skills to build static and dynamic websites. I understand how to use HTML to create page structure and content, CSS to design the look and feel of page elements, and JavaScript to add animations and user interaction. Through this learning, I have been able to create beautiful and flexible websites, from editing basic elements like text and images to creating animations and interactions like menus. Dropdowns and dynamic forms. More importantly, learning HTML, CSS, and JavaScript has opened my eyes to the world of web development, and I'm excited to continue learning and growing my skills in the field. This.
